Bloomington, IN | +1 9303335051 | [s4samyak@gmail.com](mailto:s4samyak@gmail.com) | [linkedin.com/in/samyakkshah/](https://www.linkedin.com/in/samyakkshah/) | [github.com/RexTitanium](https://github.com/RexTitanium)

## SUMMARY

Master's student in Computer Science with a strong foundation in Full Stack Development, Artificial Intelligence and Machine Learning. Developed scalable web-applications, AI-driven chat widgets and machine learning models, using React, Node.js, Python and AWS, improving efficiency by 90%. Seeking opportunities to contribute expertise in software development, scalable architecture and AI-driven applications.

## PROFESSIONAL EXPERIENCE

### Soopra.ai

Jun 2024 – Dec 2024

Software Developer Intern

San Francisco, CA

- Developed a React and Flask-based chat widget for AI integration on personal websites, enabling single line code injections and boosting adoption by **10+ users**.
- Strengthened backend security, with whitelisted website validation for paid users, reducing unauthorized widget access by **90%**.
- Engineered a video conferencing tool integrating **Google Meetings** with AI personas, enhancing user accessibility.

### Continuum (ConnectWise)

Jul 2021 – Aug 2021

Software Developer Intern

Mumbai, India

- Built pre-script and post-script automation features using **Angular and Java**, cutting down manual efforts by **50%**.
- Implemented a customizable cutoff timer control for script automation, minimizing prolonged processing risks by **90%**.

## PROJECTS AND PUBLICATIONS

### Croatian Advertisements Classification using BERT

Aug 2024 – Dec 2024

Python, PyTorch, TensorFlow, Scikit-Learn, Selenium

- Formulated a hierarchical text classification system for a Croatian advertisement company achieving **82%** accuracy for Tier 1 and **91%** accuracy for Tier 2 classification based on IAB taxonomy.
- Constructed a pipeline to collect, preprocess data, train, and evaluate BERT, RoBERTa and DistilBERT optimizing performance for multilingual classification, boosting Tier 1 prediction accuracy by **0.14** over traditional methods.

### Ignition – Learning Management System (LMS)

Aug 2023 – Dec 2023

MongoDB, Express, React, Redux, Node.js, Cloudinary, AWS

- Architected a full-stack LMS, leading a team of 4, with a calendar-integrated dashboard, hosted on **AWS**, increasing student engagement by **90%**.
- Incorporated **Cloudinary** and **MongoDB** for seamless material uploads and downloads, enhancing system functionality by **50%**.

### Bug Tracking System

May 2023 – Jul 2023

React, Node.js, Charts.js, Redux

- Devised and built a bug tracking system using Redux state management, streamlining bug resolution and project tracking, boosting project efficiency by **50%**.
- Designed a role-based access system with a Charts.js dashboard, to visualize bug severity and prioritize tasks, reducing bug resolution time by **30%**.

## TECHNICAL SKILLS

- Programming Languages** – JavaScript, TypeScript, Java, Python, SQL, C++, C
- Full Stack Technologies** – React, Redux, Node.js, Express, Flask, Tailwind CSS, Angular
- Databases** – MongoDB, PostgreSQL, MySQL, Firebase
- Frameworks** – TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, Spark
- Tools & Platforms** – Git, JIRA, Figma, Linux, Azure, AWS, Docker, Kubernetes

## EDUCATION

### Indiana University, Bloomington

Expected: May 2025

Master of Science in Computer Science

Bloomington, IN

- GPA:** 3.811/4
- Coursework:** Applied Algorithms, Software Engineering, Applied Machine Learning, Computer Networks, Elements of AI
